Summary

Adams Turkey Farm is a family-owned and operated poultry farm in Westford, Vermont, founded in 1984 by Dave and Judy Adams. They raise turkeys and chickens in large open-air barns with access to natural sunlight and roaming space, on an all-natural, vegetarian, antibiotic- and hormone-free grain. All birds are processed on-farm and USDA inspected, and they sell direct to customers via pre-orders with on-farm pickup (e.g., reserve a 2026 Thanksgiving turkey for pickup on November 23 or 24), as well as to local markets in Chittenden and Franklin counties and Burlington restaurants through Vermont's Farm Fresh Network.

Opportunity

Because Adams Turkey Farm already sells direct to consumers through on-farm pickup of pre-ordered turkeys and chickens, they are well positioned to add or expand an online ordering channel, making their direct-sales operation more accessible.
